The Nordic Chapter of the Society for Risk Analysis (SRA Nordic) invites you to its 5th conference that will be held in Copenhagen.

The objective of the SRA Nordic 2019 conference is to provide a multi-disciplinary forum for the exchange of knowledge and expertise on theories, methods and practices in the field of risk management within the Nordic and Baltic countries (Denmark (incl. Greenland), Faroe Islands, Finland, Norway, Sweden, Iceland, Latvia, Lithuania, and Estonia).

The conference will bring together the Nordic and Baltic research community on risk analysis of innovative products and technologies. The target audience are academics and practitioners interested in the assessment, characterization, communication, management and policy of the risks connected to innovation, such as risk to human health, the environment and other. The conference will be the breeding ground for student participants. Events such as a poster session and career development opportunities will enable student participants to build a strong network within the community.

Call for abstracts

SRA Nordic invites abstract submissions for oral and poster presentations. We also invite submissions for workshop proposals.
